

Who Helps Us

It is nearly impossible to create a list that includes all the people who help us. This list includes only organizations, it does not include the eighty-plus neighborhood people who help us operate our food distribution facility and food sites. It also does not include the various school and community groups who help us on a frequent basis. To these individuals and groups, although they are not listed here, we would like to take this opportunity to thank them for their help and to say we are most grateful.
